

PROFESSIONAL SUMMARY

Senior Backend Python & Data Engineer with 6+ years of experience designing scalable backend systems, distributed data processing applications, RESTful APIs, and cloud-native enterprise platforms. Strong expertise in Python, SQL, PySpark, Databricks, AWS, and Azure with hands-on experience building ETL/ELT pipelines, microservices, and high-performance backend solutions. Experienced in API development, distributed systems, workflow orchestration, CI/CD automation, and production support within Agile environments. Proven ability to develop reliable, scalable, and maintainable applications for enterprise analytics and data-driven platforms.

TECHNICAL SKILLS

Backend Engineering: Python, FastAPI, REST APIs, Microservices, OOP, System Design, Backend Architecture, API Development
Data Engineering: PySpark, Databricks, SQL, ETL/ELT Pipelines, Distributed Processing, Data Warehousing, Data Transformation
Cloud & DevOps: AWS, Azure, Jenkins, GitHub Actions, CI/CD, Git, Deployment Automation
Additional Skills: Agile/Scrum, Production Support, Debugging, Troubleshooting, Workflow Orchestration, System Reliability

CORE COMPETENCIES

Backend API Development	Workflow Orchestration	Cross-Functional Collaboration
Distributed Data Processing	System Design & Architecture	Problem Solving & Debugging
ETL/ELT Pipeline Development	Cloud-Native Applications	Agile/Scrum Development
Production Support & KTLO	CI/CD Automation	Data Transformation & Analytics

PROFESSIONAL EXPERIENCE

FACTSET SYSTEMS INDIA PVT LTD | Senior Backend Python & Data Engineer

Jun 2022 – Present

Enterprise Data Catalog

- Architected backend services and metadata management solutions for enterprise-wide data discovery and governance platforms.
- Enabled centralized access to business and technical metadata.
- Collaborated with cross-functional teams to improve metadata accessibility and analytics capabilities.

COMMS Data Pipeline

- Designed and implemented scalable ETL/ELT pipelines using Python, SQL, PySpark, and Databricks for enterprise analytics platforms.
- Architected distributed data processing workflows enabling efficient large-scale data transformation and reporting.
- Optimized pipeline performance and reliability to support enterprise BI and analytics operations.

COMMS Admin

- Engineered RESTful APIs and backend services for workflow orchestration and enterprise reporting platforms.
- Designed Python-based backend modules supporting workflow automation and user configuration management.
- Optimized deployment workflows, debugging, and KTLO support processes for production applications.

Nirnay

- Engineered a metadata-driven document evaluation platform consisting of six processing engines for research workflows.
- Developed scalable backend processing pipelines for metadata-based document evaluation and workflow automation.
- Improved operational efficiency through optimized processing workflows and system enhancements.

BOSCH GLOBAL SOFTWARE TECHNOLOGIES | Software Engineer

Sep 2019 – Jun 2022

OTAS Project

- Implemented automotive OTA update solutions supporting firmware and application deployments across connected vehicle ecosystems.
- Supported software update orchestration for nearly 60 ECUs including IVC and CGW modules.
- Contributed to distributed backend workflows for deployment management, testing, debugging, and production support.
- Collaborated with cross-functional engineering teams to improve deployment reliability and operational efficiency.

EDUCATION

SRKR Engineering College

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering
CGPA: 9.08 | 2015 – 2019

ACHIEVEMENTS

- Received STAR, Blue Ribbon, Applause, and Agile Awards for technical contributions, operational improvements, and business impact.

ACCOMPLISHMENTS

- Improved engineering stability and observability practices by promoting tools such as Lightstep and SonarQube across teams.
- Contributed to improving deployment reliability, operational efficiency, and production support processes.
